

# Solar LED Warning Light 404

**Model No:** SW-404

**Specification:** 300mm Solar LED yellow flashing Light

**Application:**

Dangerous roads or bridges with potential safety hazard, such as ramp, school gates, diverted traffic, road corners, pedestrian ways, etc.

## 1. Special Features:

- **Energy Saving:** Low power consumption and low cost with solar panel supply power.
- **Environmental protection:** Containing no hazardous substance and emitting no pollution.
- **High Luminance:** LED with USA Bridgelux chip. Providing a high luminance
- **Long lifespan:** LED lights can work more than 100,000 hours and the solar panel can perform more than 25 years.
- **Easy Installation:** No need more external power supply and install in the pole directly on the road.
- **Stable Performance:** controlled by the micro-computer, works more stable.

## 2. Specification Sheet:

Model No.	SW-404
Solar Panel	8W/18V monocrystalline , Lifespan: 15~25years
Storage Component	12V/7AH Lead acid battery
Lighting Time	200h after fully charged
Flashing Mode :	50timer per munite or customers' requested
Work Mode	24h or light controlled
LED Color	yellow
LED Wavelength	Yellow color:590~595nm
LED Qty	96pcs
Lighting Area	300mm
Visual Distance	>800meters
Lifespan	3-5years
Work Temperature	-20°C~~+70°C
Protect Level	IP55
Wind Resistance	≥1.5KN/m <sup>2</sup>
Material	Aluminum+Anti-UV PC
Net Weight	8kg
Product Size	470*470*150mm
